

Working Safe Working Smart – Training System License Costs

The Training System License is best for large organizational systems (examples are public statewide or private with many branches) with an online training system serving their employees' training needs. The curriculum (created in Adobe Captivate) is installed on the training system and is maintained by the licensed organization.

Basic terms of licensure agreement:

1. Organizations agree to only allow employees with access to the training system to use the curriculum (will not make it publicly accessible).
2. The cost is a one-time cost with no annual renewal fees.
3. A base price of \$50,000 is established for the curriculum
4. Additional fees will be added to the base cost for services as requested. Examples of additional services include IT support during the transition, pre/post test development to meet system and competency requirements, and other adjustments as agreed upon by the licensing organization and ILR.
5. Licensing organization may make adjustments to reflect their internal practices with regard to safety.
6. The licensing organization is responsible for managing the curriculum once established on the organizational training system.
7. ILR, Inc. retains copyright of the curriculum.

Agencies will need to email or call (919-384-1457) ILR with questions or to make arrangement for purchase.
